

Plugins. Simple. Intuitive.

(You don't need a PhD. to get your music sound good.)

Piticule! plugins can make your sound sparkle without putting your brain on fire. Our goal is to create products with a powerful and robust core, yet a simple and intuitive interface.

Piticule! wants to spare you the trouble of setting a large and confusing number of acoustical parameters, offering you instead plugins whose parameters have already been carefully blended to achieve the best sounding effects. You won't have to spend the time reinventing the wheel every time you start a session; we already did it for you. So, don't waste your time being a geek; be an artist!

Stay tuned during the next few months for other Simple.Intuitive tools. We would like to also hear from you: what simple tools you are missing and would like to have? Please email us your wish list!

Enjoy! Create!
